IceChat

# IceWarp Dashboard

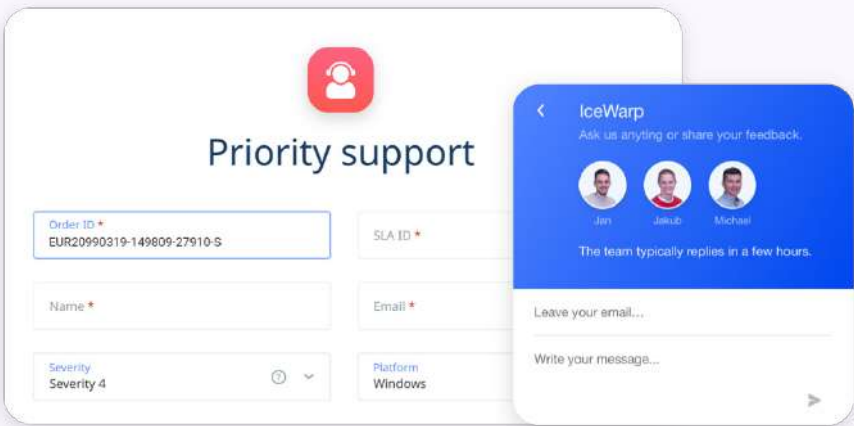

The Dashboard is IceWarp's new opening screen and your gateway to the entire collaboration ecosystem. Start your day by logging into the Dashboard at [login.icewarp.com](https://login.icewarp.com) or from IceWarp's website and navigate comfortably across all the components.

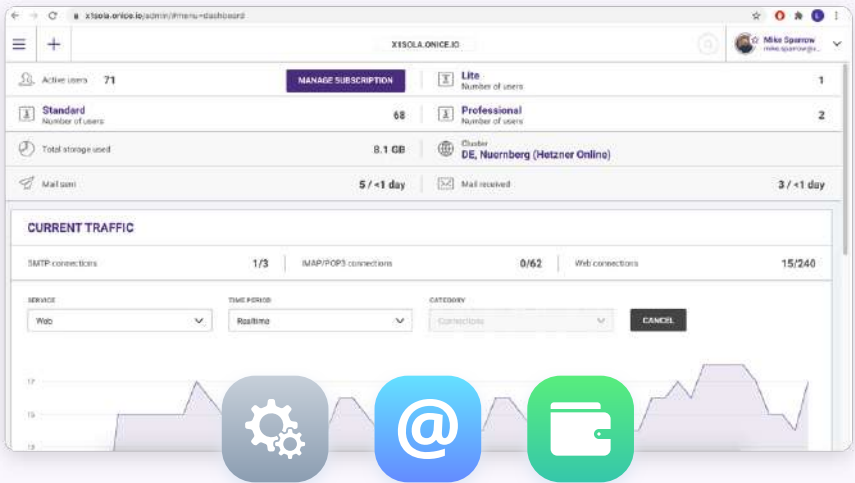

## Manage mobile devices

View, manage and delete your mobile devices or see a guide on how to add IceWarp account to your device.

## Support on Dashboard

-  **Priority support:** Administrators will have their request form prefilled when clicking the Support icon.
-  **Live support:** Every user can ask for advice right from the Dashboard just by clicking the Live Support icon.

## Bridge to admin settings

Admins can open administration console, set up domains or edit billing information right from the Dashboard without having to switch to a separate service.

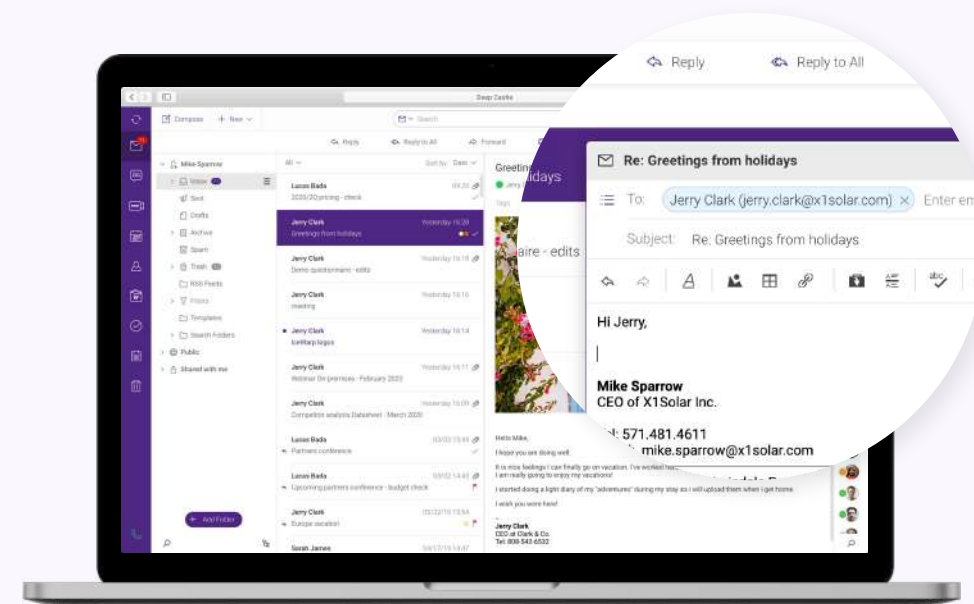

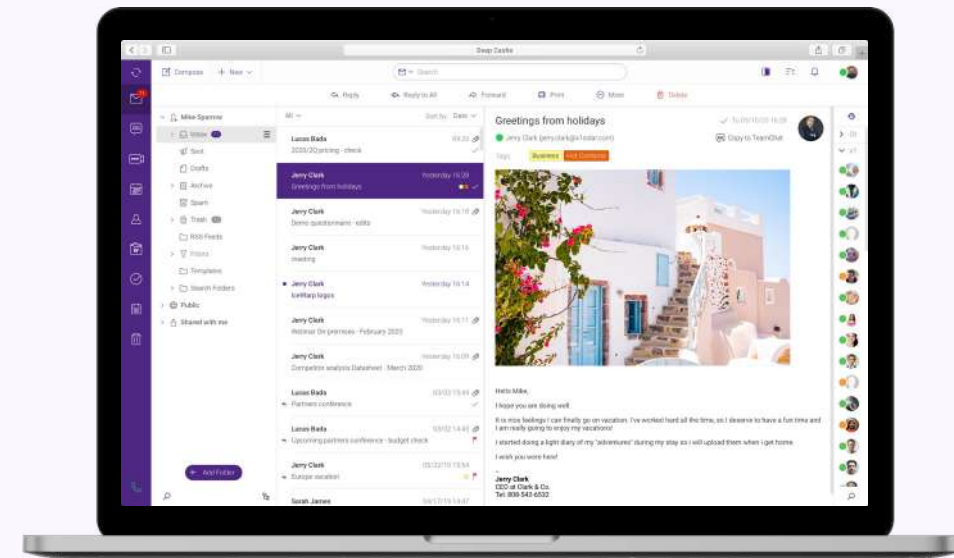

# IceWarp Deep Castle Generation 2

## WebClient

All-in-one experience

All the tools in a single browser window. You will love the advanced integration features with immediate function availability. Send an email from a TeamChat room or share a link to one. Create a meeting at the moment you receive a confirmation from your colleagues. You'll no longer need to switch between windows.

## Email at Your Own Domain

Secure business email

Email from custom @yourcompany.com address. Individual mailbox for every employee or team. Compatible with every email client. Delayed sending and on behalf sending supported.

# IceWarp Deep Castle Generation 2

## Conferences

Efficient and swift communication

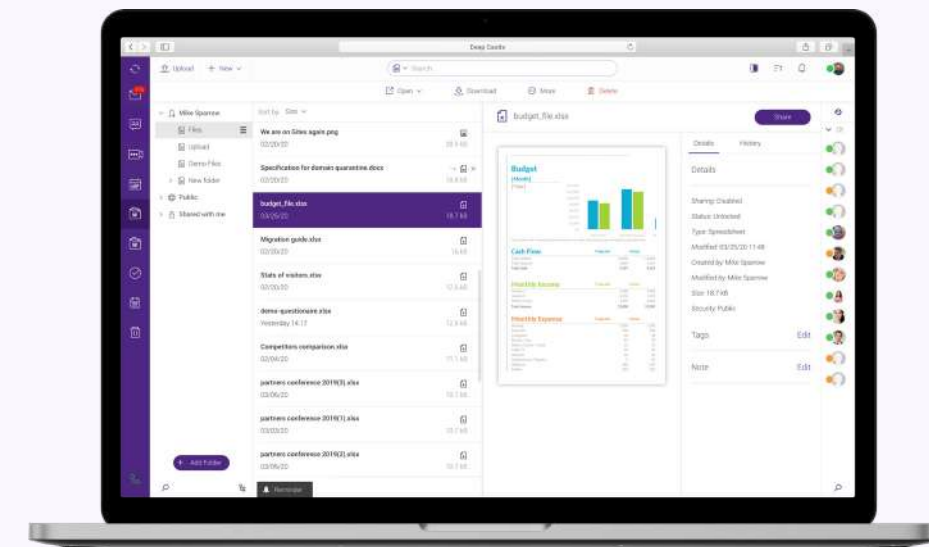

One meeting is worth a thousand emails. Conferences are free for every IceWarp user, support password protection and host dozens of participants. Mobile conferencing for Android and iOS is also available.

## Online Storage

Your data available everywhere

Have your files on any device anywhere you are. Everything is synchronized automatically. Save your work privately, or share it with your colleagues.

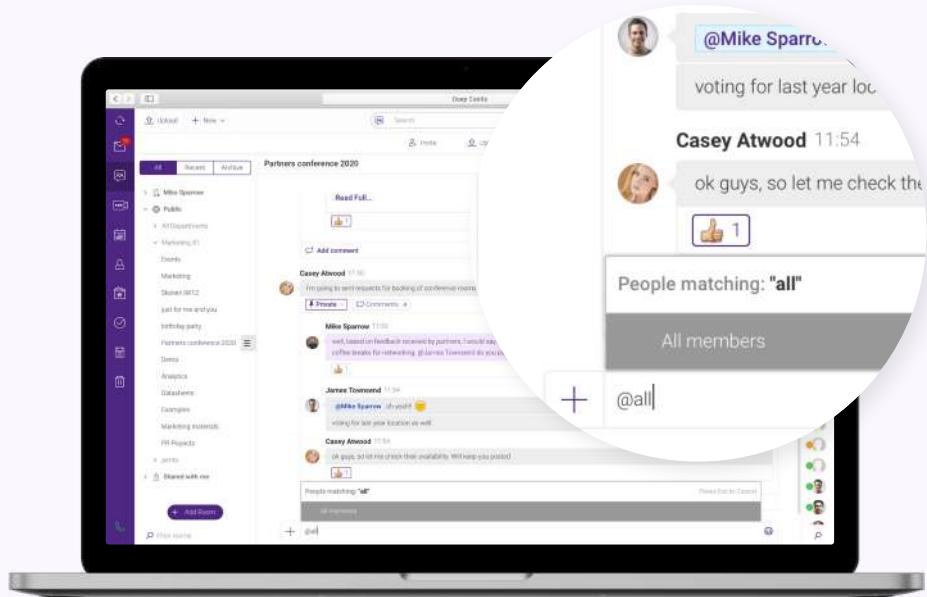

# IceWarp Deep Castle Generation 2

## TeamChat

Dynamic team collaboration

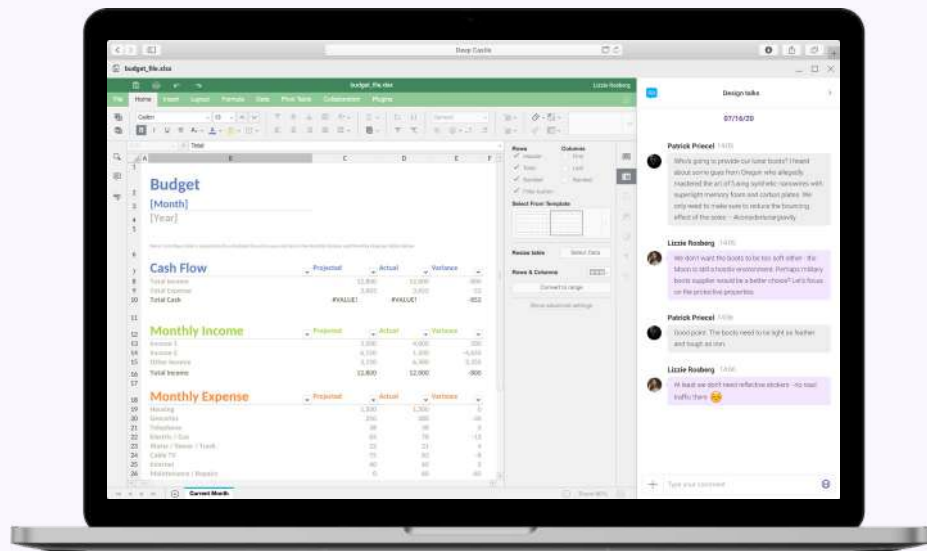

Faster and more straightforward than email. Chat with your team and invite guests. Create rooms for individual projects or teams. Share documents, brainstorm over emails and create meetings.

## Documents

For real-time collaboration

Comprehensive office suite for documents, presentations and spreadsheets. MS Office and PDF support included. Online version includes sharing, Real-time collaborative editing, change tracking. An offline version is available as well. Spreadsheets support pivot tables and macros.

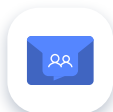

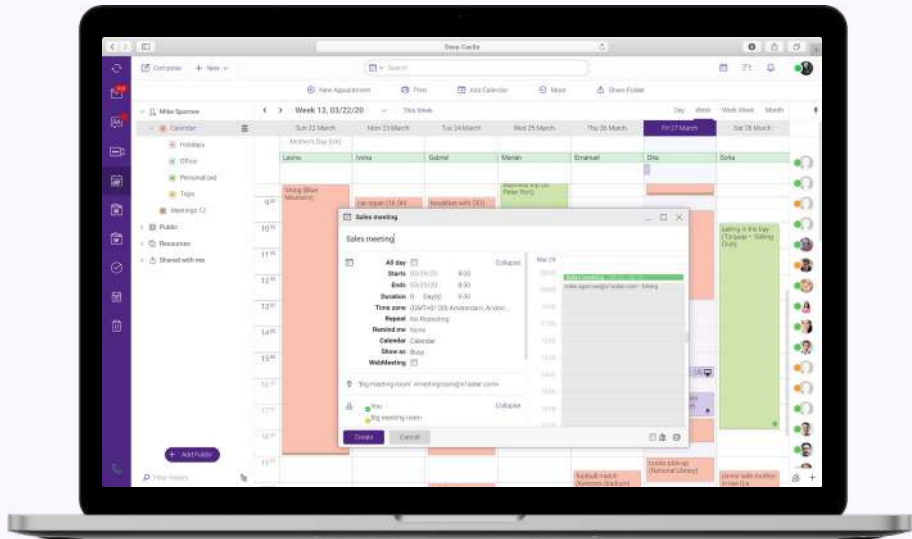

## Calendar

Easy event planning

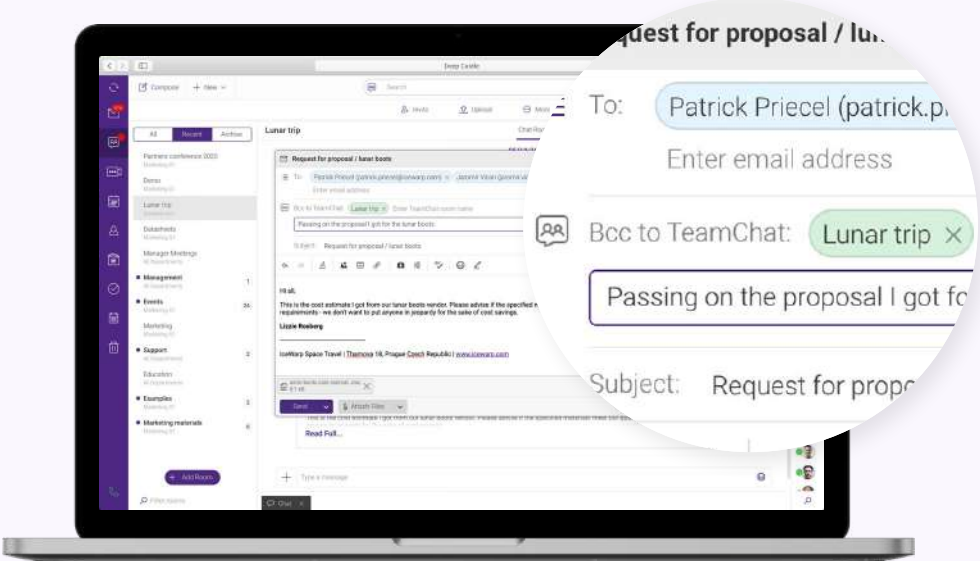

See your team’s availability in a shared online calendar. Sophisticated time slot seeker helps you to set up meetings for more people.

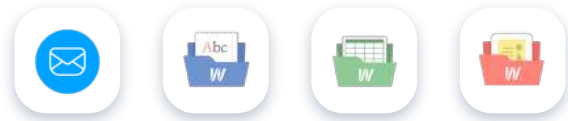

## Email and TeamChat Integration

An extension to email communication

Sounds simple, works like magic. You are n ow able to share drafts and incoming emails in TeamChat rooms or compose new ones with the help of your colleagues. When you’re done, you can easily send the emails from or to a chat room.

## Desktop Office

You don't need another office suite

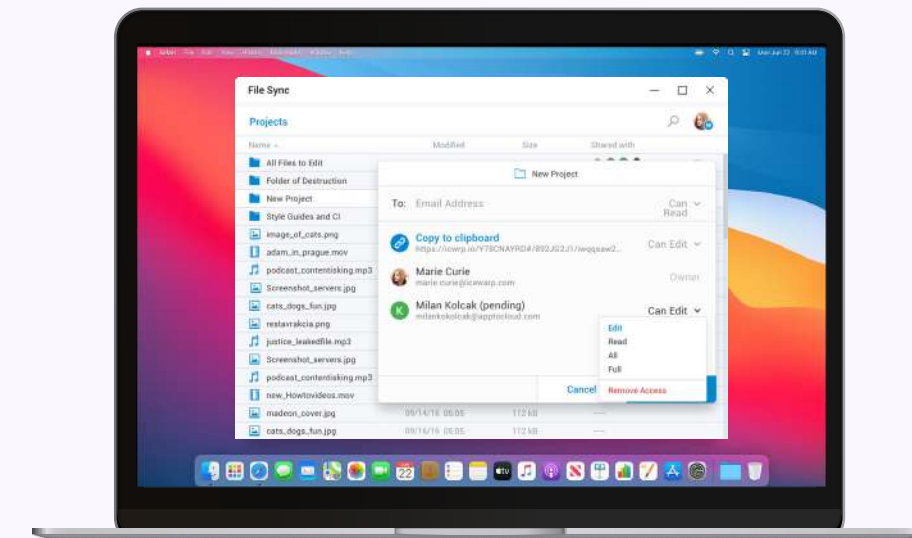

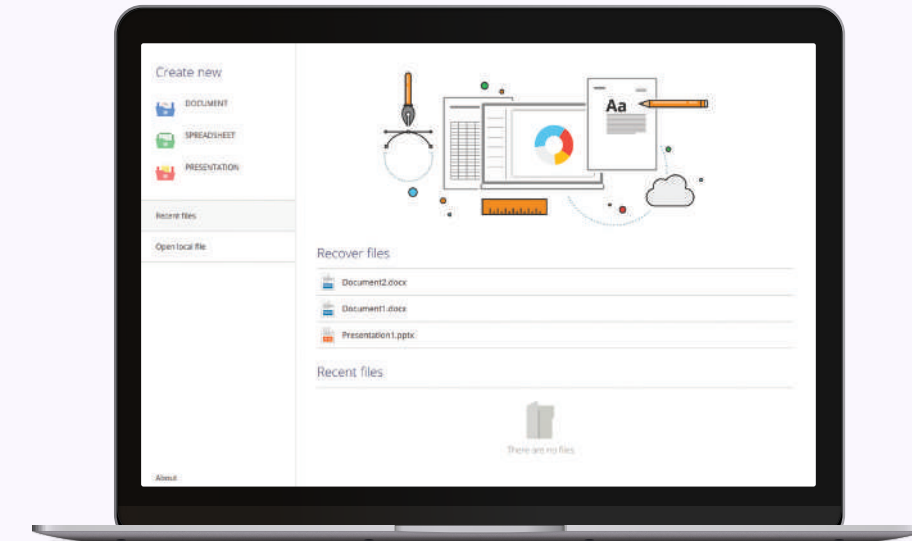

Create and edit Office documents on your desktop for half the price. We covered all your productivity needs so you don't have to spend on expensive suites.

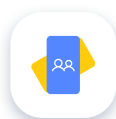

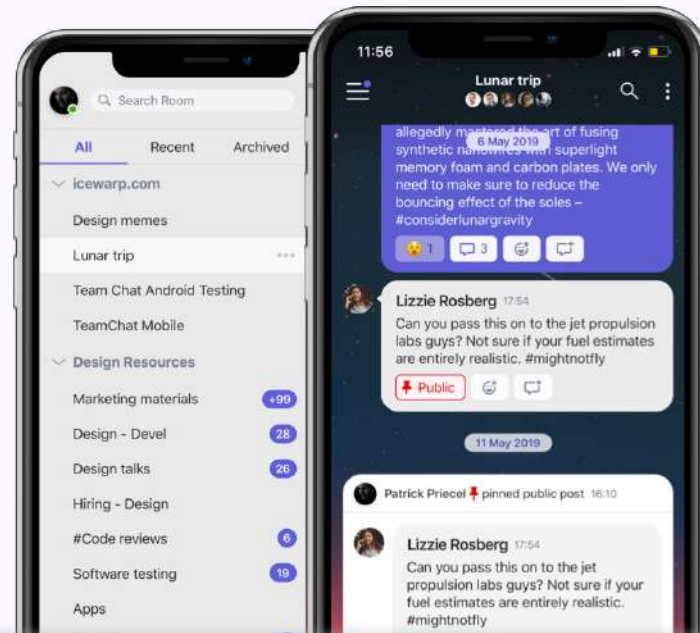

## FileSync and TeamChat Desktop

Apps for your computer

Get FileSync for automatic file syncing and sharing. Add TeamChat Desktop so you can work with multiple TeamChat accounts at the same time.

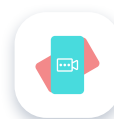

## TeamChat Mobile

Be up to date on the go

Collaborate with your team from anywhere you are. Start new project conversations, comment on existing ones or share updates with your colleagues. Nobody will tell you're following up on work from your phone.

## TeamChat Conferences

Meetings on the go

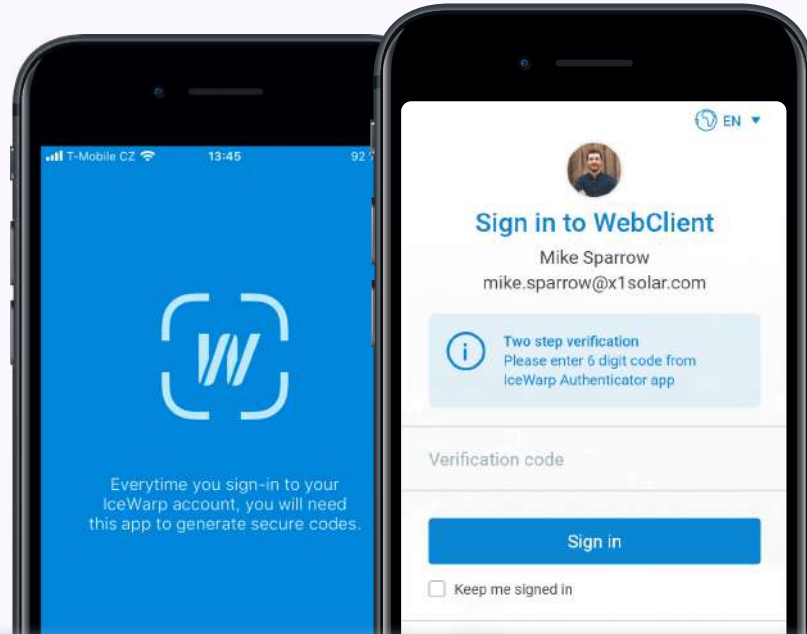

Start or schedule calls for up to 200 participants even outside IceWarp. Share files, use in-conference chat or minimize the call to work in TeamChat room. See calls agenda or history. Available in TeamChat app, for Android & iOS.

## IceChat

Always in touch

Chat on the go or instantly share your photos or location from your mobile. Send encrypted messages, pictures and files. Connect with your colleagues using audio and video calls. Lock confidential conversations using Touch ID or Face ID.

## Two-Factor Authentication

Secure your account

Add a second layer of security to your IceWarp account. Use your mobile application for two-factor account authentication. Scan your QR code and pair it to obtain a time-sensitive password.

## AntiSpam and AntiVirus

You're safe

The highest level of security in real time. All communication is encrypted thanks to Let's Encrypt SSL certificate. AntiSpam guards both incoming and outgoing email. Thus, malware won't be able to spread.

## Exchange ActiveSync

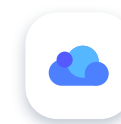

Mobiles and BYOD

With central device administration, you have a clear visibility into who is using what device. You can even remotely erase any stolen device or grant access to a device to a new colleague.

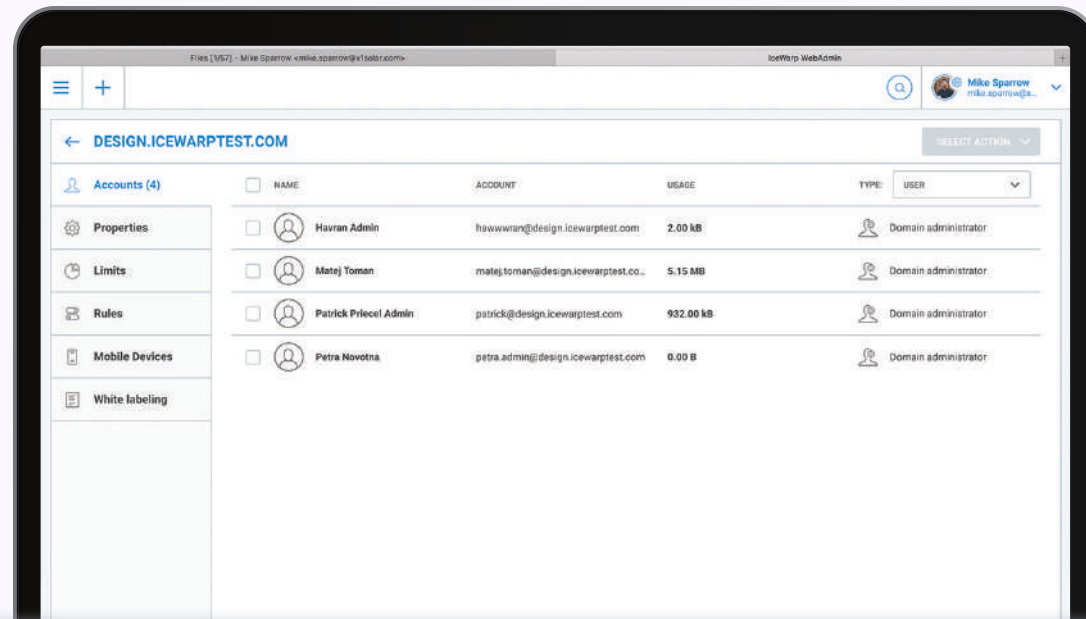

## High availability and data back up

Our clusters are built to guarantee 99,99% availability. Thanks to data replication and back ups you won't ever lose your data.

## Dedicated virtual server for each customer

In our cloud, you will have a dedicated space and you don't need to worry about security issues. Your organization will have its own server for any number of users.

## WebAdmin

Comfortably manage all services and users in one place, with an unlimited number of domains, real-time usage statistics, and SSO options for each.

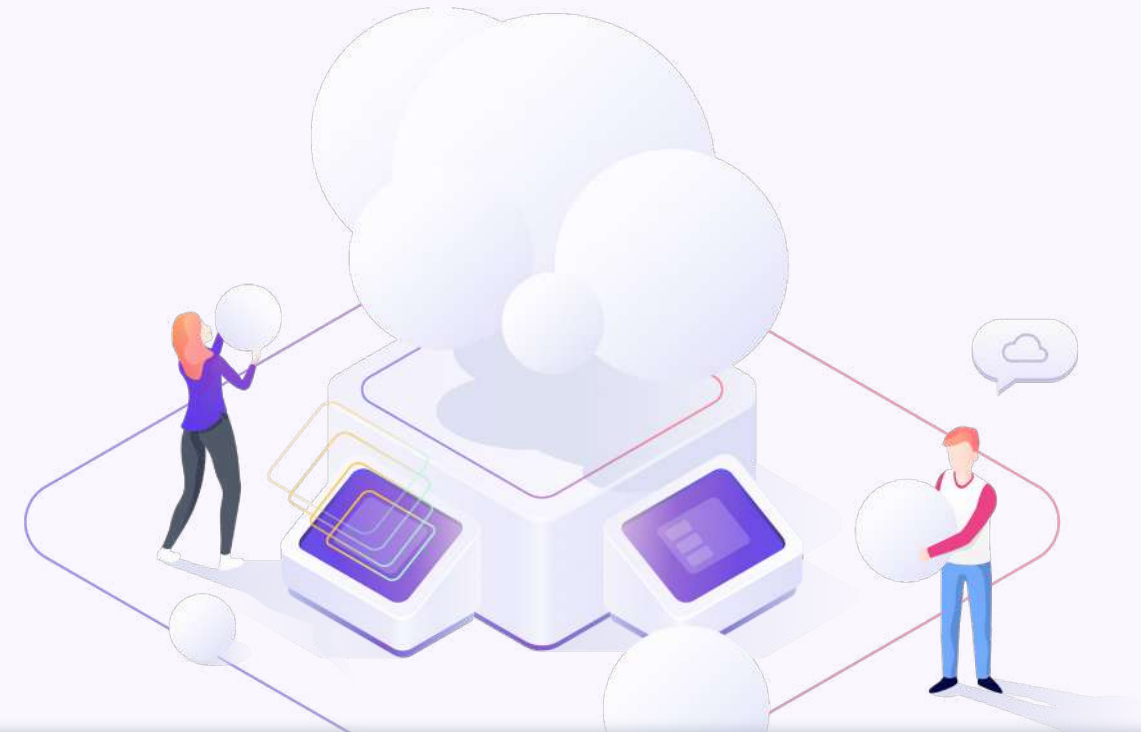

## Active Directory

The IceWarp server communicates with Active Directory / LDAP. You can easily establish Active Directory for a different domain. Create user profiles in Active Directory, it will be automatically created on the IceWarp server as well. Even users and groups can be created using this integration. In WebClient, user info is shown in the “My Details” section with a profile picture.

## Migration without Losses

It is essential to migrate servers without shutdowns. That’s why we developed migration applications and scripts for Microsoft Exchange, Office 365, G Suite, Zimbra, Kerio, Linux solutions and more. We will be happy to migrate your entire server.

## Archive

All incoming and outgoing emails can be stored 1:1 in a separate storage. You can allow or limit access to specific users at any moment. In case you need extended functionality or advice about email archiving, please feel free to contact us. We will recommend a professional tool with comprehensive functionality.

## Global Address List

With Global Address List (GAL), you have a clear overview of all users on a server. GAL stands for easy and transparent management of user contact information on a daily basis. It easily communicates with IceWarp servers as well.

# Why Choose IceWarp?

## 1 Immediate 50% Cost Reduction

A competitive price and transparent software maintenance make IceWarp the optimal solution for business communication. The more users you have, the better pricing you get, as the actual cost is based on the total number of users.

## 4 All-In-One

IceWarp is the only platform through which you can complete all your office work. Everything runs in a single window, without third party applications.

## 7 Stable and Flexible

IceWarp has grown through thousands of user installations. The core of our system is built for enormous loads and countless users. The system is optimized for low hardware requirements.

## 2 MS Office and Third-Party Mail Client Compatibility

Don't throw away your email client. You can still use it with IceWarp, enhanced with advanced security. IceWarp can work with PDF and MS Office presentations, spreadsheets and text documents.

## 5 24/7 Live Support

Every IceWarp user can reach out to our technicians through our Live Support tool. Lost login details will not be a problem anymore. Severe technical incidents have a guaranteed 2-hour response time.

## 8 Data Control

We manage the whole chain and we don't cooperate with any third party providers. We own the software, infrastructure and ensure 100% data privacy.

## 3 Perfect Alternative to Exchange, Office 365, and G Suite

IceWarp is the most complex solution for corporate communication and team collaboration. You won't lose your data in the migration process – not even your email history! Plus, you will get a more intuitive interface for users and IT administrators.

## 6 All Features Integrated

The all-in-one solution provides you with an integrated platform on which all functions work together. Send an email and share a copy to TeamChat at the same time. Or change private calls to WebMeeting for the whole team on-the-go.

## 9 Constant Innovations

Why buy an office platform that ages even faster than your cell phone? IceWarp introduces new features and possibilities for all its customers with every new version.

# About IceWarp

IceWarp is a **stable international company founded in 2001**. We’re developing **complex solutions for communication and collaboration**. Our goal is to always innovate through our services in accordance with current trends and feedback from more than **50,000 satisfied customers**.
