Kaspersky Managed Detection and Response

kaspersky bring on
the future

Challenges

55%

of companies report that their own devices were infected with malware¹

20%

of companies faced targeted human-driven attacks²

\$2.5 billion

extreme losses due to a successful cyberattack³

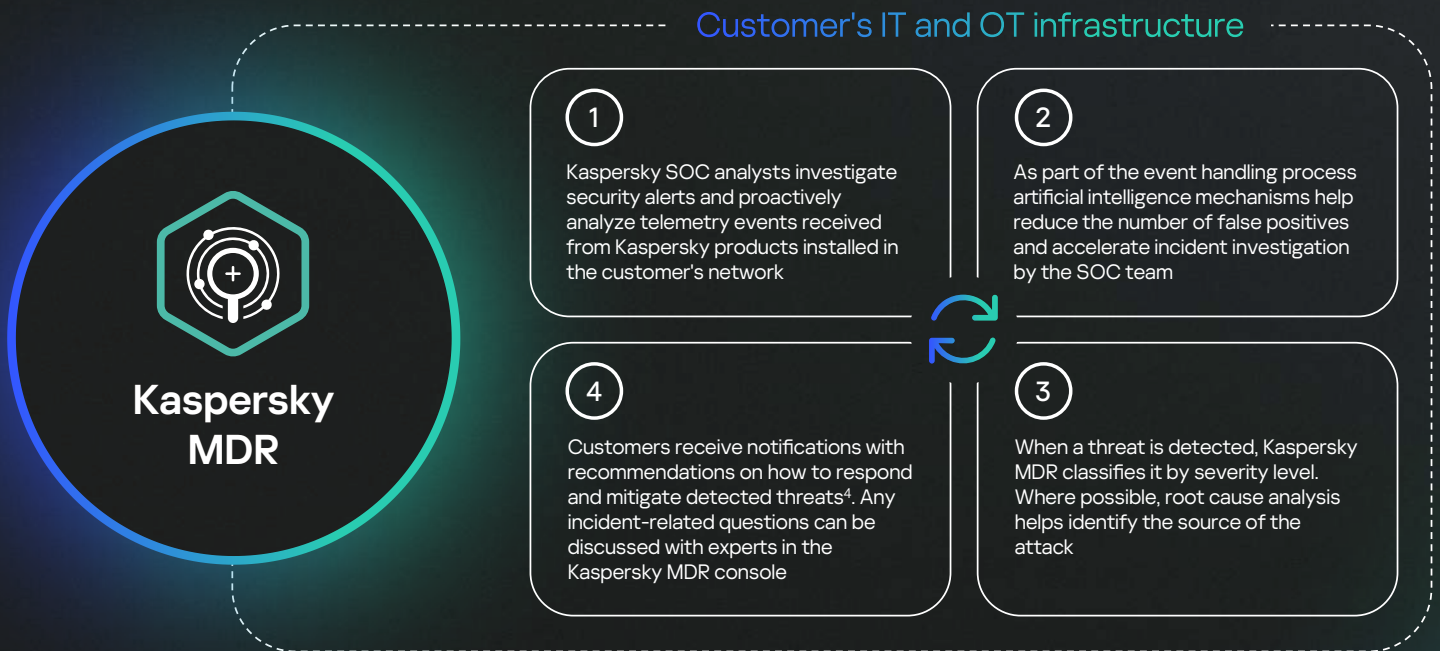

AI-powered. Human perfected

Remote working, the rapid development of information exchange methods, the widening global skills gap and the growing number of cyberthreats capable of bypassing automated prevention and detection controls are putting organizations of every size under relentless pressure. It's essential to be able to respond quickly and efficiently.

Kaspersky Managed Detection and Response (MDR) is a service offering round-the-clock managed protection against cyberthreats and sophisticated attacks that traditional automated security measures miss.

The service boosts the level of IT and OT security for organizations of every size and in every industry. It provides customers with a lack of IT security expertise a turnkey service for rapid deployment, and for experienced cybersecurity teams, it offers additional flexibility, enabling them to delegate incident detection and classification tasks to Kaspersky experts or get an additional professional opinion on incidents they've detected themselves.

How Kaspersky MDR works

¹ IT Security Economics, 2022

² Kaspersky MDR analyst report, 2023

³ Global financial stability report. The Last Mile: Financial Vulnerabilities and Risks, 2024

⁴ Customers can opt to partially or fully delegate response capabilities to the Kaspersky SOC team. Additionally, Kaspersky Incident Response can be purchased

Kaspersky MDR helps you put your business first

With peace of mind that you are always protected against even the most sophisticated threats

Enables you to refocus your in-house IT security resources to deal with business-critical issues

Provides all the major benefits of having your own SOC without the trouble and expense of establishing one yourself

Ensures rapid threat detection and response, minimizing potential downtime and financial losses

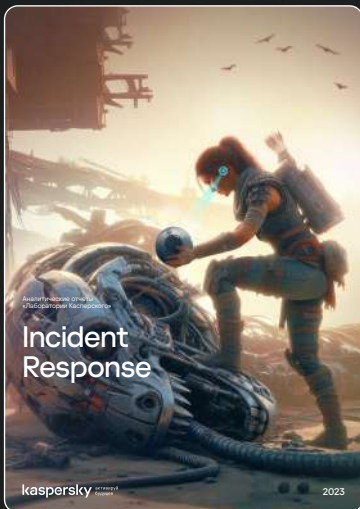

Reduces security costs overall — no need to hire and train multiple, expensive IT security professionals to cover every base

Why customers choose Kaspersky MDR?

All-in-one solution

Kaspersky MDR provides as complete as possible integration inside one endpoint agent ensuring the full cycle of threat management.

Global presence

Kaspersky MDR operates 24/7 around the world and helps organizations of all sizes and industries with varying levels of IT security maturity.

Cost-effective investment

The service enables customers to achieve a high level of security without incurring extra server costs or having to get involved with complex projects. It deploys effortlessly within your daily operations, delivering rapid protection.

Transparency & actionable insights

The service provides actionable insights and recommendations on how to respond to and mitigate detected threats. Every year we share publicly available analytics covering major trends and the current threat landscape.

AI-powered since 2005

Kaspersky MDR leverages AI to increase efficiency and reduce the time it takes to detect and respond to incidents, minimizing any potential business impact.

Unique threat intelligence

Kaspersky MDR is based on several petabytes of threat data collected continuously around the world, and more than two decades of expert analysis.

Renowned experts

Kaspersky SOC is a team of highly certified and accredited experts who have been detecting and investigating complex security incidents for organizations for almost 10 years.

Let our security team be yours
protecting your business 24x7
