N-ABLE™ DATA SHEET

N-able Adlumin Security Operations

Adlumin Managed Detection and Response (MDR)

Midmarket organizations face the same advanced threats as enterprises, but most lack the resources to run enterprise grade security operations. **Adlumin MDR** delivers scalable cyber resilience through AI powered security operations and 24/7 SOC expertise—without added complexity or headcount—to stop attacks early and minimize business disruption.

Core capabilities

24/7 SOC monitoring

- Monitor your environment around the clock with AI-powered analytics and behavioral threat detection
- Gain 24/7 access to SOC professionals who validate alerts, investigate incidents, and guide timely response

AI-powered detection and response

- Flag suspicious user behavior at the earliest sign using AI-powered, behavior based analytics
- Enrich incident response with AI that learns from every data point and adapts to emerging attacker tactics and techniques in real time
- Automate incident investigations and threat remediation with AI automation handling up to 90% of SOC investigations

Unified SecOps platform

- Get SIEM, XDR, SOAR, UEBA, darknet monitoring, honeypots, compliance reporting, network health, and threat intelligence in a single unified platform
- Leverage a vendor-agnostic approach to ingesting and correlating telemetry from across endpoints, identities, networks, and cloud

Compliance and regulatory support

- Streamline compliance with automated reporting for PCI DSS, NIST, CMMC, HIPAA, and other frameworks and regulations
- Maintain audit-ready logs and correlated event histories across the Adlumin platform.
- Generate regulatory reporting in just a few clicks, including executive and board-level response summaries and strategic recommendations

N-ABLE™ DATA SHEET

Adlumin Managed Detection and Response (MDR)

Why Adlumin MDR?

- **One unified platform:** Reduce organizational risk with a real-time, unified view of security posture across your entire environment
- **Fast deployment:** Minimize exposure by accelerating time to protection. Deploy in as little as 90 minutes.
- **Vendor-agnostic:** Preserve existing investments and reduce operational disruption with seamless integration—no rip and replace required
- **Scalable by design:** Scale security as your business evolves across cloud, on-prem, and hybrid environments
- **People + AI:** Strengthen cyber resilience with AI-driven insights guided by experienced security professionals

Key benefits

Transparent SOC model

- Eliminate black-box response with a transparent SOC model where AI accelerates investigations and analysts collaborate directly with your team
- Maintain shared understanding through clear context and evidence, with ongoing collaboration from containment to investigation and follow-up

Unified visibility and control

- Gain unified visibility across endpoints, networks, identities, and cloud in a single platform, using the same tools and data as the SOC
- Retain control and confidence with end-to-end visibility into detection, investigation, response actions, and reporting from one login

Earlier detection, faster containment

- Detect attacks at the earliest indicator using AI to surface subtle behaviors and attack patterns across your environment
- Contain threats quickly with automated response actions that limit business impact, without increasing alert fatigue or staffing

Faster time-to-value without disruption

- Reduce time to protection with deployment in as little as 90 minutes—no lengthy SOC build-out required
- Integrate easily into existing environments with a vendor-agnostic architecture that adapts to your stack instead of replacing it

Reduced operational overhead

- Lower operational burden with AI powered automation that handles routine investigation and response tasks, allowing teams to focus on higher value security decisions
- Avoid the cost and complexity of multiple third-party tools with built in SIEM, SOAR, UEBA, and threat intelligence in a single platform

N-ABLE™ DATA SHEET

Adlumin Managed Detection and Response (MDR)

What you gain

Resilient security with minimal business disruption

Detect threats earlier, contain attacks faster, and sustain continuous defense to limit downtime, operational disruption, and overall business impact.

Simplified compliance, lower audit friction

Leverage audit-ready reporting to reduce manual effort and improve accuracy across regulatory frameworks.

Reduced risk and smaller attack surface

Proactively identify vulnerabilities, excessive privileges, and emerging threats to limit attacker opportunities.

Strategic use of internal resources

Relieve teams from constant monitoring and triage so they can focus on higher-value security and business initiatives.

Adlumin Security Operations

You can build on your Adlumin MDR foundation with:

- Continuous vulnerability management
- Progressive penetration testing
- Proactive security awareness training
- Incident response
- Total ransomware defense

Protection that scales with the business

Extend consistent security across cloud, on-prem, and hybrid environments as your organization grows, without added complexity.

Operational confidence

Gain real-time visibility, transparent evidence, and clear SOC actions that reinforce trust in your security posture and decisions.

At N-able, our mission is to protect businesses against evolving cyberthreats with a unified cyber resiliency platform to manage, secure, and recover. Our scalable technology infrastructure includes AI-powered capabilities, market-leading third-party integrations, and the flexibility to employ technologies of choice—to transform workflows and deliver critical security outcomes. Our partner-first approach combines our products with experts, training, and peer-led events that empower our customers to be secure, resilient, and successful. n-able.com
